IDENTIFIERS	*Tennessee (Davidson County)

ABSTRACT

The document is one of a series of 95 booklets, one for each county in Tennessee, and presents data for Davidson County in the form of tables and charts to assist educational planning at the State and local level. The data presented is chosen for its practical value in determining which vocational course offerings would be of the greatest value to the community as a whole after considering both the demographic and economic growth patterns. By combining data found in various sections of the booklet with the knowledge available only to those persons dealing with the practical realities of day-to-day operations, it is hoped that the strengths of both the theoretician and the practitioner will emerge by causing operational decisions to be based on hard data. (Author/LJ)

INTRODUCTION

This is one of a series of ninety-five booklets, one for each county in the State of Tennessee. These booklets are presented by the Tennessee Research Coordinating Unit for Vocational Education in the interest of promoting viable Edu cional Planning at the state and local level. The data presented within is chosen for its practical value in determining which vocational course offerings would be of the greatest value to the community as a whole after considering both the demographic and economic growth patterns. By combining data found in various sections of this booklet with the knowledge available only to those persons dealing with the practical realities of day-to-day operations, it is hoped that the strengths of both the theoretician and the practitioner will emerge by causing operational decisions to be based upon hard data.

All data presented in this booklet is developed in accord with standard statistical and accounting practices and should be highly predictive of group trends. Data herein should not be treated as absolutes or isolates but may be used for normative prediction.
